Art Unit: 2834

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 12, 17, 20, 21, 24, 27, 29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bindig in view of Bast, Yasuda or Heinz (081).

Bindig (fig. 4) teaches the piezoelectric stack using an outer electrode #6 that can expand between contact points with the stack. Bindig does not use a mesh electrode or extend the outer electrodes past the end of the stack. However, selection from among known materials has long been held to be within the skill expected of the routineer. Mesh electrodes are known to be suitable for external leads as shown e.g. by Bast (324) and Heinz (018) (#7). Also extension of the outer electrodes past the end of the stack is also known as taught by #5, #6 of Heinz (081) and #13 of Yasuda (fig. 5). Since making parts integral or separable has long been held to be within the skill expected of the routineer, making the mesh outer electrode integral with a lead extending past the end of the stack would have been obvious to one of ordinary skill in the art.

Claims 13-16, 18, 19, 22, 23, 25, 26 and 28 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2834

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
